

FEATURES OF LINGUA-MASTER

The Play Bar

With the Play Bar there is no need for fast forwarding or rewinding, like on a cassette. Simply 'grab' the slider to the desired position.

When the Section buttons are clicked, the recording and the transcript text jump to the start of that section. This allows you to listen and read simultaneously. Use the Rewind button to replay and hear the pronunciation of specific sentences and words. In the 'Test Yourself' part of Lingua-Master, the Section buttons are replaced by Previous, Next and Replay buttons.

The Main Menu

Clicking a button in the Main Menu will lead you to the official Department of Education recording and transcript for that year.

In the 'Test Yourself' section, the Main Menu buttons lead to a further option: Ordinary or Higher.

When Ordinary or Higher is clicked, you will be brought to the respective exam paper for that year.

Print Button

In the 'Learn and Revise' Section, the Print Button will print the Department of Education transcript for the year under review.

In the 'Test Yourself' Section, you are given the option of printing the exam questions or exam questions and answers.

Show Answers Button

The 'Show Answers' button in the 'Test Yourself' Section allows you to check your answers against Lingua-Master's model solutions.

When clicked, the questions with answers will appear to the right of the exam paper.

Font Size Button

There are two Font Size buttons in the 'Test Yourself' Section.

Increases the font size of the text in the Questions and Answers boxes.

Decreases the font size of the text in the Questions and Answers boxes.

Previous, Next, Re-play buttons

These buttons appear under the Play Bar in the 'Test Yourself' section. They are used to move through the exam paper and the Department of Education recording.

The questions and the recording are linked; the part of the recording you are listening to is completely relevant to the question you are working on.

Use the 'Next' button to move onto the following question. Click the 'Previous' button to move on to a preceeding question. To hear a part of the recording again, click the 'Re-play' button.
