

# Maths-Master

Maths-Master is a revolutionary new study tool developed to empower students and help them develop the essential skills to master a subject that many children find difficult. It is designed specifically for the Irish curriculum, and is ideal for home use or in a school or library with computer facilities.

The software is designed primarily to bring within the reach of every student the very real possibility of achieving "A" grade in the Junior Cert or Leaving Cert exams.

Maths-Master is unique in that it actually *teaches* the student. It does this by inviting the student to think of ways to solve the problem. The student can then verify their choice by clicking a 'Hint' button which, leads all the way up to the full solutions for the maths problems if required.

## Maths-Master Products

### Junior Certificate

Algebra, higher level	€ 14
Trigonometry, higher level	€ 14
Paper 1, ordinary level	€ 32
Paper 2, ordinary level	€ 32

### Leaving Certificate

Algebra, ordinary level	€ 14
Trigonometry, ordinary level	€ 14
Coordinate Geometry, ordinary level	€ 14
Complex Numbers, ordinary level	€ 14

## JUNIOR CERTIFICATE

**ROSK**  
e-systems

[www.rosk.ie](http://www.rosk.ie)

Rosk e-Systems is the leader in the educational software field for secondary students in Ireland, with 6 products for language students and 8 products for maths students.

At the RDS Education Show in April 2001 the Minister for Education, Mr. Michael Woods, who launched Maths-Master for the Junior Certificate, described the product as a teaching aid which will, 'reinforce the work done by students in class, and helps students reach their full potential, offering endless opportunities for practice'.

# Lingua-Master

Lingua-Master is the all in one package for dealing with the Listening Comprehension part of the Junior and Leaving Cert. exams. The Listening Comprehension is 25% of the total exam (the difference between an "A" grade and a "C" grade). Recordings, grammar, vocabulary, questions and answers, and thousands of phrases and expressions that appear year in, year out, are covered in great detail.

Multimedia material such as video topics and questions from foreign t.v stations are also present on the CD-ROMs, and provide in-depth study and analysis for students.
