

Note: On most newer operating systems, Macromedia Shockwave Flash technology is included with Windows. Shockwave Flash is required for Maths-Master to work correctly.

Shockwave Flash is included on the Maths-Master CD-ROM, in the Shockwave folder.

You will need to install Shockwave Flash if:

1. You receive an error message in relation to a file called 'SWFLASH.OCX' when you are using Maths-Master.
2. The buttons in Maths-Master are not visible, or are not functioning correctly.

If either of the above problems occur, or you are in doubt as to whether or not Shockwave Flash is on your computer, install it from the Maths-Master CD-ROM, in the Shockwave folder.

WHAT WILL MATHS-MASTER DO FOR ME?

Maths- Master will:

1. Enable you to learn at your own pace, and in your own time.
2. Enable you to study material as often as you wish, without the need for a supervisor or teacher.
3. Improve your study techniques. By working with pen and paper and using the 'Hint' button to guide you step by step, you will become familiar with the methods used to solve Junior or Leaving Cert. standard problems.
