

Note: On most newer operating systems, Macromedia Shockwave Flash technology is included with Windows. Shockwave Flash is required for Maths-Master to work correctly.

Shockwave Flash is included on the Maths-Master CD-ROM, in the Shockwave folder.

You will need to install Shockwave Flash if:

1. You receive an error message in relation to a file called 'SWFLASH.OCX' when you are using Maths-Master.
2. The buttons in Maths-Master are not visible, or are not functioning correctly.

If either of the above problems occur, or you are in doubt as to whether or not Shockwave Flash is on your computer, install it from the Maths-Master CD-ROM, in the Shockwave folder.

## WHAT WILL MATHS-MASTER DO FOR ME?

Enable you to learn at your own pace, and in your own time.

Enable you to study material as often as you wish, without the need for a supervisor or teacher.

Improve your study techniques. By working with pen and paper and using the 'Hint' button to guide you step by step, you will become familiar with the methods used to solve Junior or Leaving Cert. standard problems.

Focus you on what you really need to know. Maths-Master is made by an Irish company and Irish educators. All the content is 100% related to the Junior and Leaving Cert. syllabi.

Provide a new and interesting way to learn. More than the traditional textbook Maths-Master prompts you through a problem, providing guidance with reminders, pictures, interactive diagrams and suggestions.

Serve as an excellent revision tool for the Junior Cert. or Leaving Cert. exams.

Save the teachers time, as they won't have to be constantly by the side of the student.

## HOW TO USE MATHS-MASTER

### The Main Menu

The Main Menu is a column of buttons representing all the topics in a subject area. For instance, if you purchased the CD-ROM that deals with the subject of Leaving Certificate Ordinary Level Algebra, you will be presented with a complete listing of all the topics in the Algebra section.

These topics are further broken down into sub sections.

On clicking a button pertaining to a section a question is presented on the blackboard for the student to work on. The student can use the assistance of the 'Hints' button, if necessary.
